Item.

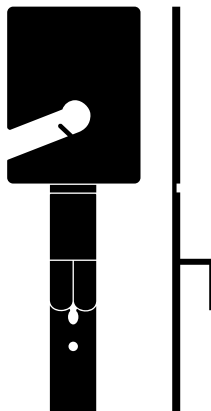

These hangers have proven to be extremely successful for use with a wide range of both prong and stud buckles. Hangers with 3BB tail (for larger buckles) display the buckle with minimum visual obstruction, resulting in a cleaner, more professional presentation of the belt.

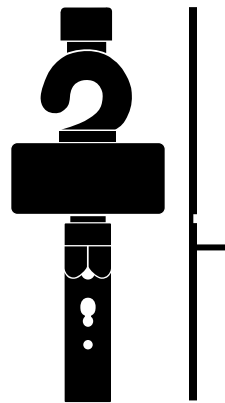

In addition, tests have shown that labor costs in attaching the belt to the hanger are greatly reduced because the buckle simply snaps into place.

The use of Series 3 hangers has grown over the last several years, as more manufacturers have taken advantage of the better display and the labor-saving benefits. Of course, your custom top can also be used with these hangers.

3 Series Extenders

Many of our customers prefer our 3 Series hangers because they help display buckles better. To help make these hangers more versatile, we have added extenders that provide a larger area between the hook and the body of the hanger to accommodate larger buckles. Extenders come in 1/2", 3/4", 1 1/4" and 1 3/4" increments and can be used with any run of 50,000 or more.

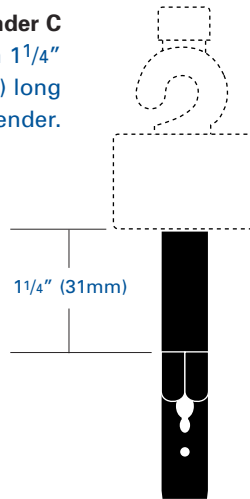

Samples available on request.

All hanger drawings shown 1/2 actual size.

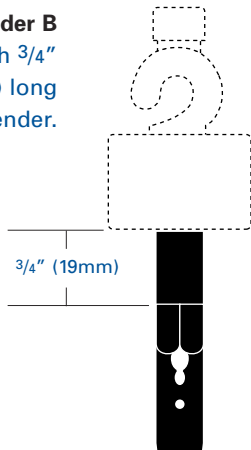

Extender A
With 1/2"
(13mm) long
extender.

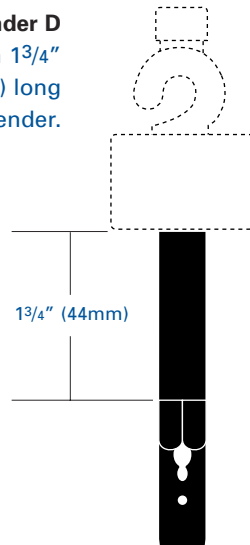

Extender C
With 1 1/4"
(31mm) long
extender.

Extender B
With 3/4"
(19mm) long
extender.

Extender D
With 1 3/4"
(44mm) long
extender.
